#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

## DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/9/2007 has been entered.

### *Priority*

Certified copy of foreign application document has been received on 3/26/2004.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Clark (US Patent 5,954,747). Clark discloses a hollow guide sleeve (54) that is capable of having a suture pass through it (it at least in the reference teaches some kind of anchor passing through it), further having both a proximal and distal end and a front annular face (55). The front annular face has a single pointed tip (see Fig. 3, distal to item 55) that is fixed relative to the annular face. Clark may also be considered to have a shoulder, at least in the juncture of where the pointed top meets the rest of the annular face. The rest of the face, juncture aside, is considered at least substantially planar. The

front point is also considered at least substantially arc-shaped, and Clark teaches at least some kind of anchor rotator tool (see 50-61 in Fig. 8) capable of deploying and rotating an anchor out of the pointed, annular end.

***Response to Arguments***

Applicant's arguments with respect to claims previously presented 1-11 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
